

## FOR FURTHER INFORMATION

### Ms. Wafaa El Alami

Head of ICPSR  
Islamic Educational, Scientific and Cultural  
Organization (ISESCO),  
Avenue des F.A.R  
P.O.Box 2275, Postal Code 10104  
Hay Ryad-Rabat  
Kingdom of Morocco.  
Tel: (+212-5) 37566052-53  
Fax: (+212-5) 37566012-13  
E-mail: icpsr@isesco.org.ma  
URL:www.isesco.org.ma

### Mr. Tajammul Hussain

Advisor (Programmes)  
COMSATS Headquarters  
4th Floor, Shahrah-e-Jamhuriat, G-5/2  
Islamabad - Pakistan.  
Tel: (+92-51) 9204892, 9214515-17  
Fax: (+ 92-51) 9216539  
URL:www.comsats.org  
Email: husseint@comsats.net.pk

### Dr. M. Molanejad

Acting President for  
International Cooperation  
Iranian Research Organization for Science &  
Technology (IROST)  
No. 71, Sh. Mousavi St., Enghelab Ave.  
P.O. Box 15815-3538, Tehran 15819  
Islamic Republic of Iran  
Tel: (+98-21) 88826830 (D), 8828051-7, 88838336,  
88922233  
Fax: (+98-21) 88838328, 88838341  
Email: mmolanezhad@yahoo.com

## OBJECTIVES

The following objectives would be achieved during the workshop to make its outcome more effective and fruitful for the participants:

- To demonstrate the process of repairing the defective instruments by the experts;
- To provide hands-on training to the participants for improving their skills for independently maintaining and repairing the scientific instruments;
- To update the participants' knowledge on the latest techniques involved in the operation of scientific instruments;
- To acquaint the participants with the functioning of scientific instruments through need-based training, as well as documentation of the repair and maintenance activities;
- To update the trainees' knowledge on changing and new technologies in scientific equipments;
- To facilitate information-exchange among scientists, researchers, technicians, service engineers, and industrialists for enhancing the existing scientific capacity.

**Language:** The working language for the Workshop will be English.

## WHO SHOULD ATTEND?

Professional technicians, scientists, researchers and service engineers from various academic and research institutions, hospitals and industries of Iran are encouraged to participate in the national workshop. For more information on the workshop, please visit the websites:

*National Training Workshop on*

# Repair and Maintenance of Scientific Engineering Equipment in Universities, Research Institutions, and Small Scale Industries

*September 28 - October 2, 2014*

*Tehran, Iran*

## Organizers

Islamic Educational, Scientific and Cultural  
Organization (ISESCO)

Commission on Science and Technology for  
Sustainable Development in the South (COMSATS)

Iranian Research Organization for Science &  
Technology (IROST), Iran

## INTRODUCTION

Scientific Research and Development activities are the most effective and sustainable tools in achieving long term national economic growth of the developing countries. A large proportion of this research is customarily conducted in the educational and industrial organizations, both in public and private sectors. The pace of research largely depends on the skills of the scientists and technicians, and the availability of well maintained scientific instruments. In developing countries, lack of planning, inappropriate equipment inventories and severe shortage of repair and maintenance facilities pose considerable obstacle for the smooth progress of research programmes. In this context, the teaching and research institutions suffer more from delayed research output and the industrial units face production losses.

Unfortunately, the concerned management in most of the developing countries, including the Islamic Countries, do not pay enough attention to the establishment of maintenance facilities, resulting in discarding of a large number of very expensive instruments and equipment. These losses can be averted by spending a fraction of money on the effective and preventive repair and maintenance processes as compared to the costs incurred due to time losses and procurement of the new instruments and by providing relevant training to the operators, concerned engineers and technicians of such instruments, equipment, etc. There is a great need to develop an indigenous capacity to repair and maintain the scientific equipment in the developing countries, since inviting foreign experts for this purpose is time-consuming and economically unviable. Manpower adept in repairing and maintaining scientific equipments of all sorts used in the teaching and research institutions and industries

can ensure uninterrupted research work, and thus lead to an overall socio-economic development of a country.

To enable the Islamic countries to achieve the technological self-reliance in the setting up of repair and maintenance facilities and to reduce the technological dependence on the foreign experts, a national training Workshop is being organized by the Commission on Science and Technology for Sustainable Development in the South (COMSATS), in cooperation with Islamic Educational, Scientific and Cultural Organization (ISESCO) and COMSATS' Centre of Excellence in Iran, Iranian Research Organization for Science & Technology (IROST). The national workshop entitled "Repair and Maintenance of Scientific Engineering Equipment in Universities, Research Institutions and Small Scale Industries" will take place in Tehran, Iran, from 21<sup>st</sup> to 25<sup>th</sup> May 2014. The Workshop is intended to highlight the issues/problems relating to the maintenance of scientific engineering equipments used in universities, research institutions and small scale industries. Two experts from Pakistan would provide hands-on training to the participants of the workshop for upgrading their skills and enhancing their capacities in repairing, maintaining and troubleshooting important scientific engineering equipments in their organizations. The workshop encompassing interactive lectures and practical training is a part of the COMSATS-ISESCO series, under which similar events were held in Ghana (2013), Sudan (2013 & 2004), Tunisia (2012), Egypt (2011), Senegal (2010) and Syria (2005). These workshops have benefited over 280 scientists, engineers and technicians by building their expertise and capacity to indigenously repair and maintain scientific instruments used in the labs of R&D institutions as well as small-scale industries in their respective countries.
