3-MONTHS PROFESSIONAL CERTIFICATION BOOT CAMP

INFORMATION & CYBER SECURITY

Information & Cyber Security (I&CS) course covers the fundamental concept of information security, network defense, penetration testing, platform hardening, IOT security, vulnerability analysis. This course prepares for career in I&CS. Participants will start from basic I&CS concept to develop their skills and work up to the higher level I&CS professional practices using Linux OS platform. The concepts covered in the training program are focused on knowledge-based training coupled with extensive hands-on application. Every tactic discussed in training is backed by step-by-step labs conducted in a virtualized environment with Itargets, tools, and vulnerable systems. Through our lab technology, every participant will have comprehensive hands-on practice to learn and apply their knowledge. The course targets to prepare the participant for Certified Network Defense of EC Council.

ELIGIBILITY CRITERIA

Final Year Students/ Graduates of BS in Info Tech, Computer Science, Software Engg, Electrical Engg and related fields.

Saturday, July 27, 2024

Timings: 4pm-6pm (PST)

Starts Aug 6, 2024

Duration: 13 Weeks

Days: Tue , Thu & Sat

Timings: 3pm-7pm (PST)
