3-MONTHS PROFESSIONAL CERTIFICATION BOOT CAMP

# MULTIPLATFORM APP DEV IN FLUTTER

This course aims to teach development of professional level apps using Flutter being Google's modern and free SD allowing to write cross platform application both for desktop web and mobile apps with the same code-base. This course enables the trainees to create fast and stunning mobile applications using Flutter. The course comprehensively covers everything from setting up development environment to deploying apps on Google Play store. The participants will learn about Dart programming language, Firebase for backend development and Figma for UI design. This course takes you from an absolute beginner to being able to release professional quality apps. The course targets to prepare the participant for Flutter Certified Application Developer Certification exam (AFD-200) of Android ATC.
